

SEARCH FOR LOST FLIERS CONTINUING

Vilhelmur Stefansson Says
Hunt to be Pressed
Through Winter

NEW YORK, Sept. 10.—Search for the six missing Russian treasure-hunters probably will be continued until next summer if necessary, Vilhelmur Stefansson, Arctic explorer and geologist, said today.

"If the flyers are not found before then," said Stefansson, "I believe our search will continue until beginning of the difficult weather next June."

Robert Wilkins, Air Com-modore Herbert Hollick-Kneebly, and three others, who were conducting an aerial survey of the Arctic region, were believed to have been blown down from four weeks ago on an attempt to fly non-stop over the pole from Moscow to San Francisco.

FREEZE-UP CLOSE
The Wilkins expedition, which has made four fruitless flights, will be compelled to abandon its present expedition in four to five weeks because of a freeze-up of open water needed for landing the big flying boat.

However, he continued, Wilkins probably will return to New York and go right back to the Arctic with a different pilot and a different landing on the ice. With such a start the search could be continued until heavy frosts and rain set in next summer.

FINANCED BY SOVIET
The Wilkins expedition is financed by the Soviet government and directed by the Explorer Club of New York, of which Stefansson is president.

The club disclosed today Wilkins still has not been within 200 miles of the location where Stefansson believed the Russians are "most likely to be down. That is, on the 67th latitude.

Contract Bridge

By WILLIAM E. MCKENNEY
Bridge players who have mastered the art of squaring an opponent out of high cards should be equally alert when defending, in seeing the squeeze coming and in taking the necessary steps if it is avoidable.

Opening lead—♥ K 11

In one of the hands played in a recent national championship, two of the players made a contract of six diamonds by means of a ruse executed aces. One or two failed to make five diamonds. The two declarers were able to make the six-diamond contract of six, because the defending player who had all the decisions to make, failed to see in time that he had to take early measures to guard against being squeezed in three suits.

The bidding of East and West is perhaps a little extraordinary. It bids are, of course, made only for the purpose of keeping the bidding open to the point where East can decide the spot in which he wishes to play the hand. His bid of spades was to show the spade ace, and the later bid of four diamonds was to leave East indisputably in the choice of the final game contract, which he seemed so anxious to reach.

However, ambitious as the contract was, it was made against any but the most limited defense and followed with the best result. A squeeze was developed. East refused, led a small diamond to the jack, ruffing with the third round of hearts, and then led four more diamonds. West's South discarded one heart. Not had to find five more diamonds. A study of the cards shows that this made further defense impossible.

Contract Problem
(Solution in next issue)
East is playing a contract of six diamonds. South-western has the first trick. South can lead the contract by only one play at that point should he continue with another round of hearts or shift to another suit.

The correct play was to abandon hearts after winning the first trick, and lead the spade king. The squeeze no longer exists, because the material is not in position to make the heart in dummy a threat against South's has been removed from dummy.

Is Director WORK STARTED ON ICE PLANT OUT AT ARENA

Preliminary Construction
Now Under Way—Ice
By October 15

Edmonton's \$30,000 artificial ice plant will be installed in the arena and ready for operation by October 15, and already considerable preliminary work has been completed. City Engineer A. W. Hadow reported today.

The trench for the supply and return main in the refrigeration plant has been dug, and workmen are now busy making necessary installations at a cost of approximately \$5,000. In addition to these alterations, \$1,500 is being spent on the construction of a waiting room for the skating rink, and the area and \$1,500 on an improved lighting system.

UTILITY SERVICES
The \$2,000 expenditure covers the laying of a sand floor and sleepers for the piping, necessary utility connections and the construction of a machine room to house the refrigeration equipment.

In order to give players a better shaped rink, the length of the ice rink will be increased to 110 feet, 226 feet nine inches to 216 feet by straightening the curve at the north end of the arena. This necessitates the revision of the seating plan.

FIRST SHIPMENT
First shipment of piping equipment for the plant was received last Wednesday and one of the contractor's representatives will arrive in the city within a few days to superintend the installation of the plant.

LINDE CANADIAN REFRIGERATION
The Linde Canadian Refrigeration Co. has been awarded a \$20,000 contract for the plant. All necessary labor is being hired by the company and not by the city engineering department.

Faith Unbounded in Canadian West Says C.P.R. Head

Expresses Profound Disagreement With
Any Theory Prairies Not Suited To
Permanent Settlement

VANCOUVER, Sept. 10.—Sir Edward Beatty, K.C., president of the Canadian Pacific Railway, last night told the Canadian Chamber of Commerce that, despite present drought conditions on the prairie provinces and marked decrease in production, the central area of the Dominion was well-suited to permanent settlement.

In his address to the annual dinner of the chamber which is now holding its 11th annual convention here, Sir Edward said:

"At this moment, following years of low prices, now succeeded by a year of disastrously low prices, but high prices, there are not a few who attempt to argue that the prairie provinces are not suited to permanent settlement. It is those who once forecast it would not produce enough to pay for the sale price of trains were it not."

STAIN'T ENTIRE
"It may be an opportune moment to say, however, the most profound disagreement with any theory that the prairie provinces are not suited to permanent settlement."

Sir Edward said the statement he often heard that the Canadian Pacific was responsible for "ploughing of land" in the "Tannus" area was built from the ground up. He said that the statement had been left in natural range was untrue.

For urgent national reasons the Canadian Pacific transcontinental line was built from Winnipeg to Calgary and over the forbidding route of the Klondike River. "Although the original plan had been to construct a line from Winnipeg to the Yellow Head Pass," he said.

"Had that plan been followed, in the conditions which existed at the time of the Canadian Pacific construction, there can be little doubt that the consequences would have been to abandon to generation both prairie and national, from the republic to the south, a great portion of the prairie provinces."

"That this alteration in plan was made does not mean that the officers of the Canadian Pacific did not know, from the first, that some areas of the south country were better adapted to the operation of cattle ranches than to grain growing," he said.

Sir Edward said he had previously pointed out several times that there was no cause for alarm that the "temporary surplus" of wheat in the prairie provinces would harm the prospects for sale of Canadian grain.

READY MARKET
He said the present balance between wheat supply and demand proved "second question" in Canada had a full crop this season. It would have found ready sale at prices to return a fair reward to prairie farmers.

"Even a high price for wheat will not compensate for such shrinkage of production as we have seen," he said.

TAX BODY CAN URGE CHANGES IN B.N.A. ACT

Chairman Rowell Speaks
On Terms Of Reference
For Commission

OTTAWA, Sept. 10.—With plans for public hearings in every province and capital as Ottawa to commence as soon as the provincial government submissions are ready, the royal commission on Dominion provincial relations completed its first session today.

Chief Justice Rowell presided over the first session of the five-man commission, said last night he could not forecast a date for the opening sessions. As soon as two or three of the provinces are ready, he said, the commission will start its work.

Municipalities, which are the backbone of the provinces and derive their jurisdiction and taxation powers from the provincial legislatures, will be represented before the commission by the provincial governments, Justice Rowell said. If any provincial government desired, municipal politicians to go directly before the commission there would be no objection.

Chief Justice Rowell said he was satisfied that the terms of reference gave the commission direct instructions from the federal government, the North American Act with a view to recommending changes in the constitution necessary to improve economic relations between the Dominion and the provinces.

Rialto Feature Will Run Late Each Evening

Owing to the length of the feature "Lost Horizon" the management of the Rialto theatre advises patrons that the theatre will run late each evening in order to afford those who would get to the theatre an opportunity to see the complete picture.

The theatre will remain open until 12 o'clock each evening if necessary to accommodate those who come late. Patrons are advised to endeavor to come to the theatre as early as possible so that they will not be inconvenienced by the late start.

Varsity Bound?

Lucky you, with no worries but to sign up for the easiest courses and choose a wardrobe that will see you smartly through the term. As for Varsity No. 1... well, when we patterned out to Varsity each course seemed pretty fair competition for every other one as far as a forbidding aspect was concerned but do not let long lists of imposing-sounding terms and reference books baffle you. Not at all... you'll take them in your stride! Worry the second isn't really a worry at all... not when EATON'S is ready with the gayest and most practical of wardrobe suggestions... and of course, we know that budgets (troublesome things) mustn't be ignored. We've poked our nose into the many interesting corners around EATON'S and behold, we've discovered a multitude of this-and-thats that will promote a girl's success in a Varsity career.

A Pair Beats All

Never—says the poker enthusiast. Well, maybe you're right (far be it from me to profess to a knowledge of the game) — but who said we were talking about poker. We were enthusing about the waltzers and skirts that team up to be "naturals" for campus and classroom wear. A rugby game, a Tuck dance, a House Dance are just as fitting backgrounds for their rugged good looks. Mixed, if you like — plaid with plain, we mean or blended in colors that are pleasing complements to each other. As for planning us down on the matter of price... natty little knitted numbers boast tickets from \$1.98 to \$3.98. And skirts, although they're higher this season come at \$1.98 to \$3.98.

Watch Your Step

It's not our purpose in life to hand out admonitions (we're not that old yet) but we'd like to sound a warning note re. the fact that correct shoe fittings are essential for the enjoyment of an active, full-on-life on and off the campus. But don't get alarmed for we know how you feel about shoe smartness, m'cars. That's why we smile contentedly when we mention "Young Moderns"—smart as whips and comfort in every inch of the lasts. How much? Another grin of satisfaction—just \$6.50!

Cheers for Sheers

Extra loud cheers when sheers goes hand in hand with durability. Not as impossible as it sounds... just step up to EATON'S Hosiery Counter any day. Ask for EATON'S 3-thread high twist real silk stockings and you've exactly what we said... sheerness and durability! Easy, don't you think! And all for a dollar.

Towels, Toweling, Flannelette, Cotton Prints
